

WEEK 7 TESTING REQUIREMENTS

HealthConnect Experience Lab

Data Analytics Track

1. ANALYTICAL TESTING REQUIREMENTS

1.1 KPI VALIDATION

- Validate all KPIs with fresh data
- Verify No-Show Rate calculation
- Test Reminder Effectiveness measure
- Check High-Risk Patient Rate

1.2 DASHBOARD TESTING

- Test all slicers and filters
- Verify KPI calculations update correctly
- Test cross-filtering between visuals
- Check mobile responsiveness

1.3 STATISTICAL TESTING

- Verify statistical significance
- Re-run Chi-Square test with new data
- Re-run T-Test with new data
- Validate correlation analysis

2. DATA SCIENCE INTEGRATION TESTING

2.1 FEATURE VALIDATION

- Verify feature recommendations work in model
- Test model with validated findings
- Compare model performance with/without features

2.2 MODEL TESTING

- Test model with new data
- Validate predictions against actual outcomes
- Check for bias in predictions

3. VISUALIZATION TESTING

3.1 CHART VALIDATION

- Verify all charts display correctly
- Test chart interactivity
- Check color consistency

3.2 FILTER TESTING

- Test each slicer independently
- Test slicers in combination
- Verify reset functionality

4. PERFORMANCE TESTING

4.1 SPEED TESTING

- Measure dashboard load time
- Test with full dataset
- Test with filtered data

4.2 SCALABILITY

- Test with larger dataset (if available)
- Check memory usage
- Verify refresh performance

5. USER ACCEPTANCE TESTING

5.1 USABILITY

- Test with sample users
- Gather feedback on dashboard
- Identify improvement areas

5.2 ACCESSIBILITY

- Check color contrast
- Test keyboard navigation
- Verify screen reader compatibility

6. DOCUMENTATION TESTING

6.1 DOCUMENTATION REVIEW

- Verify all documentation is complete
- Check for accuracy
- Ensure all links work

7. TESTING SCHEDULE

Week 7 Day 1-2: KPI and Dashboard Testing

Week 7 Day 3-4: Statistical and Model Testing

Week 7 Day 5: User Acceptance Testing

Week 7 Day 6-7: Documentation and Fixes

Prepared By: Emmanuel Atuns
